

Adam has been immersed in property development and building performance for 40 years. Having worked in 21 countries and held leadership positions at several firms, Adam has a unique skill set derived from experience in project management, property development, design team management plus building commissioning. Adam is passionate about promoting the concept of "Commissioning Management" as an effective project management tool to hand over buildings that actually work. Adam devises and delivers successful project, leadership and testing strategies that achieve optimum outcomes.
